

SUFIYAN KHAN

DevOps Engineer Intern | Cloud & Infrastructure

☎ +92 335 7543076 ✉ sufikhan980@gmail.com in [sufiyan-khan-cloud](#) 🌐 [SufiyanKhanCloud](#) 🌐 [Portfolio](#)

SUMMARY

DevOps Engineer Intern who has responded to live production attacks, engineered ransomware-resistant infrastructure, and shipped Zero-Trust networking for a 15+ developer team at Teknoloje Solutions. Focused on securing and automating Windows Server environments end-to-end.

EXPERIENCE

DevOps Engineer Intern

Teknoloje Solutions

Feb 2026 – Present

Karachi, Pakistan

- Performed live incident response on an active brute-force attack (2,659+ attempts, 5 attacker IPs), blocking threats in real-time and hardening server access via a **Zero-Trust WireGuard VPN** architecture.
- Engineered ransomware-proof backups using an isolated **PowerShell** FTP vaulting engine with zero persistent network access, eliminating 5+ hours of manual backup work weekly.
- Deployed a self-hosted **Gitea** platform for 15+ developers with **RBAC** and completed a full backend migration from **SQLite** to **MS SQL Server**.
- Resolved live production outage by diagnosing **CORS** and mixed-content errors across a decoupled React + .NET stack on **IIS**, restoring full **HTTPS** functionality within a single working session.
- Administered **Windows Server 2019** infrastructure including VPN onboarding for 10+ users, firewall hardening (SMB, NetBIOS), and account lockout policies across 2 production environments.

SKILLS

Cloud: AWS (EC2, S3, VPC, IAM), Windows Server, Linux (Ubuntu/Debian)

DevOps: Docker, GitHub Actions, Jenkins, Gitea, Git

Automation & IaC: PowerShell, Bash, YAML, Terraform, Ansible

Observability: Prometheus, Grafana, PromQL

Networking: WireGuard, IIS, SSL/TLS, DNS, Firewall

PROJECTS

MAS-Simulator Queueing Theory Engine

[GitHub](#) | [Live Demo](#)

- Built a **GitHub Actions** CI/CD pipeline provisioning **AWS EC2** via **Terraform** and **Ansible**, with **Prometheus & Grafana** APM monitoring via GitOps. **Tools:** Docker, Next.js, PromQL

Jenkins CI/CD Pipeline

[GitHub](#)

- Developed a **Groovy** pipeline on AWS using **Jenkins Shared Libraries** and **RBAC**, slashing deployment time from 2 hours to 12 mins and reducing code duplication by 60%.
- **Tools:** Jenkins, Docker, AWS EC2, Groovy

CERTIFICATIONS

IBM: DevOps, Cloud Computing, Agile & Scrum, Linux & Shell Scripting, Git & GitHub

Google: [Prompting Essentials Specialization](#)

EDUCATION

BS in Computer Science, University of Karachi (UBIT)

Jan 2023 - Dec 2026
