SUMMARY

Junior DevOps Engineer at Teknoloje Solutions building and maintaining production CI/CD pipelines, self-hosted Git infrastructure, and Windows Server environments for live commercial products. Experienced in incident response, IIS deployments, and infrastructure automation.

EXPERIENCE

Junior DevOps Engineer

Teknoloje Solutions

Feb 2026 – Present

Karachi, Pakistan

- Built production **CI/CD pipelines** for Angular 19 + ASP.NET Core 8 apps on **IIS** using a **GitHub-to-Gitea** sync bridge, **PowerShell**, and **Windows Task Scheduler**.
- Resolved live **SQL Server** connection pool exhaustion on a production VPS by deploying a SQL Agent cleanup job and logon trigger to stabilize database sessions.
- Fixed a production outage by diagnosing **CORS** and mixed-content issues across a decoupled **Angular + ASP.NET Core** stack on **IIS**, restoring full **HTTPS** functionality.
- Performed live incident response on an active brute-force attack (**2,659+ attempts, 5 attacker IPs**), blocking threats in real-time and hardening server access via a **Zero-Trust WireGuard VPN** architecture.
- Deployed self-hosted **Gitea** with **RBAC** for 15+ developers and migrated the backend database from **SQLite** to **MS SQL Server**.
- Automated infrastructure backups using an isolated **PowerShell** FTP engine with zero persistent network access, saving 5+ hours of manual work weekly.

SKILLS

Cloud: AWS (EC2, S3, VPC, IAM), Windows Server, Linux (Ubuntu/Debian)

DevOps: Docker, CI/CD, GitHub Actions, Jenkins, Gitea, Git

Automation & IaC: PowerShell, Bash, YAML

Observability & Networking: Prometheus, Grafana, PromQL, WireGuard, IIS, SSL/TLS, DNS, Firewall

Currently Building: Terraform, Ansible, Kubernetes

PROJECTS

MAS-Simulator Queueing Theory Engine

[GitHub](#) | [Live Demo](#)

- Built a **GitHub Actions** CI/CD pipeline provisioning **AWS EC2** via **Terraform** and **Ansible**, with **Prometheus & Grafana** APM monitoring via GitOps. **Tools:** Docker, Next.js, PromQL

Jenkins CI/CD

[GitHub](#)

- Developed a **Groovy** pipeline on AWS using **Jenkins Shared Libraries** and **RBAC**, slashing deployment time from 2 hours to 12 mins and reducing code duplication by 60%. **Tools:** Jenkins, Docker, AWS EC2, Groovy

CERTIFICATIONS

IBM: DevOps, Cloud Computing, Agile & Scrum, Linux & Shell Scripting, Git & GitHub

Google: [Prompting Essentials Specialization](#)

EDUCATION

BS in Computer Science, University of Karachi (UBIT)

Jan 2023 - Dec 2026
