SUMMARY

Junior DevOps Engineer managing production infrastructure across multiple live servers at Teknoloje Solutions: 16+ CI/CD pipelines, self-hosted Git infrastructure, and Windows/Linux environments. Hands-on with incident response, IIS, and SQL Server administration, plus working knowledge of Kubernetes.

EXPERIENCE

Junior DevOps Engineer

Teknoloje Solutions

Feb 2026 – Present

Karachi, Pakistan

- Built and maintained **16+ production CI/CD pipelines** for Angular 19 / ASP.NET Core 8 on **IIS** via a **GitHub-to-Gitea** sync bridge, **PowerShell**, and Task Scheduler.
- Provisioned a **Windows Server 2025** environment from scratch (IIS, **SQL Server 2025**, .NET hosting, CI/CD) with security hardening and **PowerShell**-automated backups.
- Led real-time response to a live **brute-force attack (2,659+ attempts, 20+ IPs on SMB/445)**, hardening access via firewall rules, lockout policies, and a **Zero-Trust WireGuard VPN**.
- Resolved live **SQL Server** connection-pool exhaustion on a production VPS via a SQL Agent cleanup job and logon trigger.
- Deployed self-hosted **Gitea** with **RBAC** for 15+ developers and migrated the backend from **SQLite** to **MS SQL Server**.
- Automated infrastructure backups with an isolated **PowerShell** FTP engine, saving 5+ hours of manual work weekly.

SKILLS

Cloud & OS: AWS (EC2, S3, VPC, IAM), Windows Server, Linux (Ubuntu/Debian)

CI/CD & Containers: Docker, GitHub Actions, Jenkins, Gitea, Git, Kubernetes, MS SQL Server, SQLite

IaC & Scripting: PowerShell, Bash, Python, YAML, Terraform, Ansible

Observability & Networking: Prometheus, Grafana, PromQL, WireGuard, IIS, SSL/TLS, DNS, Firewall

PROJECTS

MAS-Simulator Queueing Theory Engine

[GitHub](#) | [Live Demo](#)

- Built a **GitHub Actions** CI/CD pipeline provisioning **AWS EC2** via **Terraform** and **Ansible**, with **Prometheus** & **Grafana** monitoring via GitOps. **Tools:** Docker, Next.js, PromQL

Jenkins CI/CD Pipeline

[GitHub](#)

- Developed a **Groovy** pipeline on AWS using **Jenkins Shared Libraries** and **RBAC**, cutting deployment from 2 hours to 12 minutes and code duplication by 60%. **Tools:** Jenkins, Docker, AWS EC2

SmartHireAI (Final Year Project 1)

[GitHub](#) | [Live Demo](#)

- Built and deployed an AI recruitment platform (**Next.js**, **Supabase**, **Gemini API**) on **Vercel** with CI/CD and a containerized DevOps layer.

CERTIFICATIONS

IBM: DevOps, Cloud Computing, Agile & Scrum, Linux & Shell Scripting, Git & GitHub

AWS: Cloud Quest: Cloud Practitioner **Google:** Prompting Essentials Specialization

EDUCATION

BS in Computer Science, University of Karachi (UBIT)

Jan 2023 – Dec 2026

Member, AWS Cloud Club (UBIT)
